SUBJECT: The FDA's trying to control non-pharmaceuticals

[Message]

Recently Dr. Beth Yetley of the FDA attended a UN committee meeting in Europe in violation of US law. Her proposal was to seek consensus to control non-pharmaceutical nutrients (vitamins, herbs, various hormones, etc.) by proposing a 'legal' upper limit to these over-the-counter preparations.

1) Were you behind this attempt to limit US citizen access to these substances?

2) Why hasn't Janet Reno investigated and prosecuted this official for breaking the law? (I know that this topic is tender, but I am sure that you believe in supporting the law!)

Thank you for looking into this topic.
